

COVID-19

- A threat for everybody. A disease that caused millions of deaths worldwide and has pushed humanity to the comfort of their own houses.

Distribution of Vaccines for COVID-19

- Although not yet ready for the public, many countries, mainly third-world countries may not be able to have the vaccine, due to the lack of resources.

Unemployment

- From sole proprietors to corporations, many have lost their jobs due to the emergence and threat of the COVID-19 pandemic.

Fake News

- Information is relevant, especially now, that most of the population is not yet allowed to go outside due to the threat of COVID, therefore, people look for information online. Many information is found online, including those that are fake. This may mislead people to think of outrageous things, and making things worse not only for the individual, but also the society.

Disobedience of the Public

- Many sacrifice their lives to help people throughout this pandemic. But there are others that disobey the law/protocol. Not only are the people that are disobeying risking their lives, but also the people around them.
